OCS - Charging for Customer Service

        11 March 1964 a check on open
literature regarding any types of arrange-
ments for prorating computer costs among
users was requested by AD/CS Becker.
This question continued to be raised but
no satisfactory solution yet reached.

SCIPS - CODIB

STAT

                     (16 Mar 1964) felt OCS shld
cooperate but not initiate any action to
bring a community body under CIA control
unless DCI directed. If DIA took initiative
he felt they wld be picking up one more problem
He didn't feel they wld be able to use SCIPS
data any more than OCS had been able to,
which was not much.
